

Embedded Programmable Control Panel

TS-9400K

Description:

Embedded programmable control panel is a panel with touch screen. It could remotely control the matrix controller to switch, save all matrix devices in the conference room, office, etc.

Feature:

- * Remote power supply by the matrix controller, no need independent adapters.
- * Support programming pictures, graphics, text, keyboard and more friendly interface.
- * With high-sensitivity resistance touch screen, the operation reaction is faster.
- * Installation method: embedded wall, embedded table, convenient and easy installation.
- * The software interface is simple, clear and easy to operate.

Specifications:

Model	TS-9400K
Power Supply	5V-26V
Communication Interface	RS-485
Power supply interface	RS-485
Download Interface	Micro USB
Screen Size	3.5inch
Screen Type	TFT LCD Screen
Resolution	320×240
RS - 485 Protocol	Baud rate: 9600bps, data bit: 8 bits, stop bit: 1, no parity check bit
