8+8MP Dual-Sight Polarlight Bullet WizMind Network Camera

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, IVSS, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive AI solutions for verticals.

Series Overview

Equipped with built-in GPU chip and dual micro PTZ, the camera can monitor panorama and details at the same time. The angles and focus length of the two lenses can be adjusted separately and remotely, which is easy for installation. With hyper DoF technology, the camera has clear image in the foreground and background. Adopting deep learning algorithm, the camera supports various functions such as perimeter protection, crowd density, face recognition, and video metadata, and more than one functions can be enabled at the same time. It is applicable to arterials, streets, alley, and entrance/exit, and more.

Functions

Time-Division Exposure

Time-Division Exposure technology ensures that when the device is taking multiple snapshots of more than one targets, the quality of the snapshots will not be affected. It can also be used to adjust the brightness, speed and more of targets, to produce high quality snapshots. It is widely used in scenes that have pedestrians and vehicles, and captures clear images of faces and license plates.

Dual Visual Angle

With the technology of Dual Visual Angle, the camera can monitor two separate scenes at the same time.

Dual Micro-PTZ

With the Dual Micro-PTZ technology, the angles of the two lenses can be adjusted physically and remotely, which is easy for installation.

Hyper DoF

With Hyper DoF technology, DoF and iris of the camera can be adjusted separately. With the largest iris, the camera can display the image of large DoF.

- 3 lenses and 2 channels are integrated into the design.
- Adopts advanced technologies such as Hyper DoF, Illumination by Area, to achieve full coverage of different speed targets with a larger DoF distance under low illumination.
- Flexible remote debugging through the Dual-micro PTZ.
- Two channels:
  Channel 1: 8-MP 1/1.2" CMOS image sensor, low luminance, and high definition image.
  Channel 2: Dual 4-MP 1/1.8" CMOS image sensors, low luminance, and high definition image.
- Outputs max. 8 MP (3840 × 2160)@25/30 fps.
- ROI, SMART H.264+/H.265+, flexible coding, applicable to various bandwidth and storage environments.
- Multiple intelligent resources switchable:
  Channel 1: IVS, face recognition, face detection and video metadata.
  Channel 2: IVS, crowd distribution map and People counting.
- Intelligent functions of Channel 1 and Channel 2 can be enabled at the same time. (except Video metadata & Crowd distribution map).
- Hyper DoF technology: DoF and iris of the camera can be adjusted separately. With the largest iris, the camera can display the image of large DoF.
- Time-Division Exposure technology ensures that when the device is taking multiple snapshots of more than one targets, the quality of the snapshots will not be affected. It can also be used to adjust the brightness, speed and more of targets, to produce high quality snapshots.
- Panoramic splicing: up to 180° panoramic angle meets the requirement of broad scenarios.
- Alarm: 7 in, 3 out; audio: 2 in, 1 out; 485; BNC; supports max. 256 G Micro SD card.
- 12 VDC power supply, easy for installation.
- IP67 protection.
Panoramic Splicing

With advanced splicing algorithm, Dahua Panoramic Splicing technology deletes overlapped area and splices multiple images to be a complete panorama. The field of view of the spliced image can be up to 360°, which largely improves surveillance efficiency and user experience. Generally, after splicing, the field of view of four-sensor camera can be 180°, and the field of view of eight-sensor camera can be 360°.

Illumination by Area

This technology allows you to independently control the lighting in multiple areas of the image, enabling the device to easily adapt to different scenes, save power and perform more efficiently.

Cyber Security

Dahua network cameras employ a series of security technologies, including security authentication and authorization, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.
