

HPE ProLiant DL325 Gen10 Plus v2 7232P 3.1GHz 8-core 1P 32GB-R SR100i 8SFF 500W PS Server (P53330-B21)

What's new

- Powered by the 3rd Generation AMD EPYC™ Processors with more compute performance compared to the previous generation.
- Enhanced storage management with Tri-mode storage controllers supporting NVMe/SAS/SATA drives.
- Shorter chassis (less than one meter long) delivering improved compatibility for datacenters.
- Supports 3rd Generation AMD EPYC processors with 3D V-cache, providing 768 MB of L3 cache per processor.

Overview

Do you need a versatile single socket server that can scale with your virtualized workloads?

Building on HPE ProLiant as the intelligent foundation for hybrid cloud, the HPE ProLiant DL325 Gen10 Plus v2 server offers the 3rd Generation AMD EPYC™ Processors, delivering more performance compared to the prior generation. With up to 64 cores and up to 280W processor, 16 DIMMs for memory up to 3200 MHz, this product not only delivers low-cost virtual machines (VMs) but also better compute performance. Equipped with PCIe Gen4 capabilities, HPE ProLiant DL325 Gen10 Plus v2 server offers improved data transfer rates and higher networking speeds. Enclosed in a chassis shorter than one meter, the HPE ProLiant DL325 Gen10 Plus v2 server is more compatible and delivers a 2-socket performance in a 1-socket 1U rack profile.

Features

Workload Optimization

Harness major compute power - The HPE ProLiant DL325 Gen10 Plus v2 server harnesses major compute power and can support the 3rd Generation AMD EPYC™ processors with up to 64-core 280W processor.

It provides up to 128 lanes of PCIe Gen4 improves I/O throughput and reduces latency.

Tri-mode storage controllers enhance storage management coupled with an advanced storage RAID solution.

It provides real-time operational feedback on server performance plus recommendations for fine-tuning BIOS settings to customize for changing business needs.

360 Degree Security

The HPE ProLiant DL325 Gen10 Plus v2 server is tied into the silicon root of trust and the AMD Secure Processor, a dedicated security processor embedded in the AMD EPYC system on a chip (SoC), to manage secure boot, memory encryption, and secure virtualization.

HPE ProLiant security begins with the corruption-free manufacture of the server and auditing the integrity of every component – hardware and firmware – to provide verification that the server begins its lifecycle through an uncompromised supply chain.

HPE ProLiant servers provide rapid detection of a security-compromised server, even to the point of not allowing it to boot, verifies containment of malicious code, and protects healthy servers.

HPE ProLiant servers provide automated recovery from a security event, including restoration of validated firmware, and facilitating recovery of operating system, application and data connections, which provide the fastest path to bring a server back online and into normal operations.

When it's time to retire or repurpose an HPE ProLiant server, one-button secure erase speeds and simplifies the complete removal of passwords, configuration settings and data, preventing inadvertent access to previously secured information.

Intelligent Automation

The HPE ProLiant DL325 Gen10 Plus v2 server simplifies and automates management tasks, establishing a solid foundation for an open, hybrid cloud platform enabled by composability.

Embedded in HPE servers, HPE Integrated Lights-Out(iLO) is an exclusive core intelligence that monitors server status, providing the means for reporting, ongoing management, service alerting, and local or remote management to quickly identify and resolve issues.

Automation and software-defined control reduces time spent on provisioning and maintenance, and reduces deployment times.

HPE InfoSight for servers continually analyzes server infrastructure and applies real-world examples of hundreds of thousands of servers to predict and prevent problems before they can adversely affect business operations.

Delivered as-a Service

The HPE ProLiant DL325 Gen10 Plus v2 server is supported by HPE GreenLake to simplify IT infrastructure management across your entire hybrid estate. With 24x7 monitoring and management, our experts do the heavy lifting to manage your environment with services built into consumption-based solutions.

Rapidly deploy a broad portfolio of cloud services such as machine learning operations (ML Ops), containers, storage, compute, virtual machines (VMs), data protection, and more. Workload-optimized, preconfigured solutions can be

delivered to your facility quickly, decreasing downtime.

Hewlett Packard Enterprise provides customers choice in how they acquire and consume IT beyond traditional financing and leasing, offering options that free trapped capital, accelerate infrastructure updates, and provide on-premises pay-per-use consumption with HPE GreenLake.

Technical specifications

HPE ProLiant DL325 Gen10 Plus v2 7232P 3.1GHz 8-core 1P 32GB-R SR100i 8SFF 500W PS Server

Product Number	P53330-B21
Processor name	AMD EPYC™ 7232P (8 core, 3.1 GHz, 32 MB, 120W)
Processor number	1 processor included
Processor core available	8 core
Processor cache	32 MB L3
Processor speed	3.1 GHz
Power supply type	1x 500W HPE FlexSlot Power Supply
Expansion slots	3 maximum, for detailed descriptions refer to the QuickSpecs
Memory, standard	32 GB (1x 32 GB) RDIMMs
Memory type	HPE DDR4 Smart Memory
Included hard drives	None ship standard, 8 SFF supported
Optical drive type	Optional, None ship standard
System fan features	8-standard fans
Network controller	HPE 1GbE 4-port OCP3 Adapter plus choice of OCP or standup card
Storage controller	HPE Smart Array SAS/SATA controllers optional, none ship standard, refer to the QuickSpecs for more details
Infrastructure management	HPE iLO Standard with intelligent provisioning (embedded), HPE OneView Standard (requires download) HPE iLO Advanced, HPE iLO Advanced Premium Security Edition, and HPE OneView Advanced (require licenses)
Warranty	3/3/3: Server Warranty includes three years of parts, three years of labor, and three years of on-site support coverage. Additional information regarding worldwide limited warranty and technical support is available at: http://h20564.www2.hp.com/hpsc/wc/public/home . Additional HPE support and service coverage for your product can be purchased locally. For information on availability of service upgrades and the cost for these service upgrades, refer to the HPE website at http://www.hp.com/support .
Drive supported	None ship standard, 8 SFF supported

[For additional technical information, available models and options, please reference the QuickSpecs](#)

HPE Services

No matter where you are in your transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From strategy and planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

Consulting services

Experts can help you map out your path to hybrid cloud and optimize your operations.

Managed services

HPE runs your IT operations, giving you unified control, so can focus on innovation.

Operational services

Optimize your entire IT environment and drive innovation. Manage day-to-day IT operational tasks while freeing up valuable time and resources.

- HPE Complete Care Service: a modular service designed to help optimize your entire IT environment and achieve agreed upon IT outcomes and business goals. All delivered by an assigned team of HPE experts.
- HPE Tech Care Service: the operational service experience for HPE products. The service provides access to product specific experts, an AI driven digital experience, and general technical guidance to help reduce risk and search for ways to do things better.

Lifecycle Services

Address your specific IT deployment project needs with tailored project management and deployment services.

HPE Education Services

Training and certification designed for IT and business professionals across all industries. Create learning paths to expand proficiency in a specific subject. Schedule training in a way that works best for your business with flexible continuous learning options.

[The Defective Media Retention \(DMR\)](#) service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. [Comprehensive Defective Material Retention \(CDMR\)](#) allows you to keep all data retentive components.

HPE GreenLake

[HPE GreenLake edge-to-cloud platform](#) is HPE's market-leading as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model, on premises, fully managed in a pay per use model.
