

### Description

Electric opening and closing curtain motor. Built-in induction electric opening and closing curtain. Adopting advanced distance intelligent identification technology. It is suitable for families, villas, apartment buildings, leisure places, hotels, conference rooms, cafes, etc.

### Features

- \* Adopt mute design with automatic lubrication.
- \* In the case of power failure, it can be used like ordinary curtains.
- \* Support light touch start. Gently pull the curtain in a certain direction, the curtain will automatically run until it is completely opened or closed and then stop automatically.
- \* Support the stop function. When the curtain is running, it will stop automatically to protect the motor when it encounters resistance.
- \* It is equipped with a highly sensitive overheat protector to prevent damage caused by overheating of the motor.
- \* Support wireless control function.
- \* Support strong power control and weak current control mode.

### Specifications

Model no.	TR-0725
Running speed	0.15m/s
Rated torque	2N·m
Carrying capacity	Divided into single motor / dual motor carrying, please refer to the bearing parameter table for details.
Maximum power	66W
Receiving frequency	433.92MHz
Receiving sensitivity	-110dBm
Working power	AC 100~240V, 50/60Hz
Maximum current	0.3A
Dimensions (mm)	297(L)*62(W)*42(H)
