

# Motorized Remote Control Curtain

## TS-9125D

### Description:

It is an electric opening and closing curtain motor that adopts advanced remote intelligent identification technology. Suitable for families, villas, apartment buildings, leisure places, hotels, conference rooms, cafes, etc.

### Feature:

- \* Adopt automatic lubrication silent design.
- \* In the case of power failure, it can be used like ordinary curtains.
- \* Support light start. Pull the curtain lightly in a certain direction, it will run automatically until it is fully opened or closed.
- \* Support the stop function. When got blocked, it will stop automatically to protect the motor.
- \* Equipped with high sensitive overheat protector to prevent damage caused by motor overheating.
- \* Support RS485 protocol control function.
- \* Support strong current control and weak current control mode.

### Specifications:

Model	TS-9125D
Running speed	0.15m/s
Rated torque	2N · m
Carrying capacity	Divided into single motor / dual motor bearing, please refer to the carrying parameter table
Maximum power	66W
Working power	AC 100~240V, 50 / 60Hz
Maximum current	0.3A
Dimension (mm)	297 (L) * 62 (W) * 42 (H)
